4.4 — GitHub Pages

Step	Detail
Source	Deploy from a branch → `main`, folder `/` (root)
Expected live URL	https://20pavangowda06-png.github.io/portfolio-building/
Status	Pending — to be enabled by the student in Settings → Pages (see below). GitHub's website does not accept password sign-in for this account, so the API/browser route could not complete this step.

Student step (30 seconds): open the repository → Settings → Pages → under "Build and deployment" select "Deploy from a branch" → Branch: `main`, folder `/` (root) → Save. Wait 1–2 minutes, refresh, and confirm the green banner with the live URL, then visit it and confirm the Projects section shows.
